Turnstiles

Securitas Security Services Ireland know that Security is a major issue. Something as simple as a turnstile or barrier will help to protect both your site and your staff.

What is a turnstile?

A turnstile is a form of gate which allows one person to pass at a time.

It can also be made so as to enforce one-way traffic of people, and in addition, it can restrict passage to people who swipe a card, fob or pass.

Securitas Security Services Ireland can offer a wide range of turnstiles for your business needs, from full to half height turnstiles, with a variety of finishes to suit all locations.

A wide range of access control system options are also available such as card, push button intercom or keypad, providing secure entry and exit for restricted areas.

How can a turnstile benefit your company?

Benefits

- Secure access at perimeter and internal sites.
- Control and monitor pedestrian or vehicle flow in high traffic areas.
- Complete security solution can be provided through integration with access control.

Features

- Full and half height options available.
- Industrial steel finish can be painted in corporate colours.
- All barriers can be fully automated using ISYS Ireland access control systems.

Full Height Pedestrian Turnstile

Full height turnstiles are an ideal solution for a variety of modern applications. Constructed from mild or stainless steel for long lasting and maintenance free performance They incorporate the very latest in modern design and styling to ensure maximum convenience and ease-of-use.

They have a comprehensive range of basic features to suit individual client requirements, including 90° or 120° rotor assemblies, canopies, down lights and fire alarm activation (to engage free rotation).

Benefits

- Can be controlled using almost any type of access control.
- Fully motor driven.
- Either one way or bi-directional versions available.
- Available either with or without canopy and lighting.
- Finished in Brushed Stainless Steel or powder coated to customer specification

Half Height Pedestrian Turnstile

Waist height turnstiles are an ideal solution for a variety of modern applications. Constructed from mild or stainless steel for long lasting and maintenance free performance, they incorporate the very latest in modern design and styling to ensure maximum convenience and ease-of-use.

Benefits

- Can be controlled using almost any type of access control.
- Control devices concealed within the tough outer shell.
- Available in both a single and a slim-lime dual configuration.
- Finished in Brushed Stainless Steel

The Turnstile range is remarkably effective at delivering against security criteria without compromising on appearance. An outstanding range of materials and finishes allow systems to harmonise with their settings.
