Images sizes on the new websites (Epi7)

Image indication of content area for example start page corp hero image, the important details of the image should be in the middle and left part of the image.

For case image there is an option for the editors to set the text overlay at left or right. So if the text box is at left, details should be at the right.

Start page image
Minimum 1400px x 720px
For consistency use same height.
Image type should be jpg with a compression of 80%
A detailed start page image should not be more than 200kb

Top image
Minimum 1400px x 600px
Image type should be jpg with a compression of 80%
A detailed top image should not be more than 200kb

Highlight images
Here we need 2 formats of the images
Rectangular image: 720px x 340px
Square image: 233px x 233px
Images should be in jpeg with a 80% compression
Should be around 80kb max at weight.

Solution images (thumb images added on service pages)
Images should be 440px x 440px
Jpeg and compression at 80%
in weight 40kb max
Tip. use a cropped section of the hero images to give the users a similarity to the page.

Case block image
Images should be 1400px x 520px
Jpg and compression at 80%
in weight 100kb max

Person page image
Image 225px x 300px

Tip! use jpeg mini service for great compression (jpegmini.com)
