

Securitas Mobile Security Solutions

Securitas Mobile provide a range of services including key holding & alarm response (both commercial and domestic), mobile patrols, a locks and unlocks service for commercial premises and lone worker protection/escort services.

A complete low cost, modern and balanced security solution. Our Professional Mobile Security Officers can provide you with a Key holding and Alarm Response Service, or a secure premises 'Lock up and Unlocks' service which can include turning off all unnecessary electrical equipment, securing all windows and points of entry plus all fire exits. We will perform a lockdown of the premises and fully alarm the premises.

Our Professional Mobile Patrol Service provides a complete low cost security solution ensuring stability and continuity of your business which in these harsh economic times is paramount in your business thinking. The spot checks provided by our mobile patrol service helps prevent criminal activity, as there is no discernible patterns to when our officers will patrol your building. Our guards perform regular external and/or internal mobile patrols, and opening and closing premises, as well as attending to alarm activations as well as other verified electronic activations from your alarm system.

Whether you are a small to medium-sized company or a multinational, mobile patrol services may be the best fit for your needs.

As a small to medium-sized company that requires security, you need your doors to be locked, your window checked, your property to be regularly patrolled and your alarms responded to. You need all this but may want to pay a fraction of the cost of a permanent guard.

From a larger company perspective, you can reduce your costs and help optimise your security program at smaller facilities where a static guard is not a viable solution.

Low cost and very effective security solutions for you and your company are now available through Securitas Mobile Ireland. Let our trained and PSA licensed Mobile Patrol Officers help you prevent, deter and detect vandalism, theft and respond to other safety-related incidents and where an emergency intervention is required allow Securitas Mobile to be your first responder.

While Securitas patrols your property after hours in clearly marked vehicles, you can enjoy your time off with peace of mind. Our mobile guards are trained in emergency procedures and quick response.

Mobile Patrols

Our mobile patrols are a highly effective visual and physical deterrent, used to move unauthorised people off site and deter theft.

We can devise internal and external patrol routes to act as an effective deterrent, and these will be carried out randomly, so that the pattern of patrols remains ambiguous for any unwanted visitors.

Our fully trained, PSA licensed mobile patrol officers wear the highly recognisable Securitas uniform and drive our liveried vehicles, which again act as a strong visual deterrent to unauthorised people on site, therefore, reducing the likelihood of theft and vandalism.

As well as deterring criminal activity, mobile patrols alert our Licensed Officers to the threat of fire, flood or other damaging incidents that affect your business.

All our vehicles are fitted with a satellite tracking system. This system allow us to provide complete 3rd party proof of our world class service with regard to our intervention and response times.

Reporting systems

Barcodes are placed at agreed inspection points around your site and they are scanned on the patrol by our Officers using our in house developed Personal Digital Assistant Guard Reporting System (GRS).

- More activity, interaction and customer contact
- Makes our services tangible
- Real time data, customer, guard
- Higher quality, efficiency and productivity
- Automated production
- Modularized and flexible
- Start small and grow

From this unit a full report of the Patrol can be available to you immediately by email, which will highlight the time of the patrol, the name of the Officer that carried out the patrol, and any further information you may need to know, such as safety or security hazards that have been found during the patrol.

Free text can be added to the report and photographs can be embedded on to the incident report and this report is emailed real time to the report receivers.

Key Holding

Finding a trustworthy key holder is an integral part of running any successful business. An increasing number of businesses understand the risks associated with having their own employees acting as a key holder. With the insurances and risks issues in mind, more companies are now opting to manage this risk by outsourcing their key holding to a professional security company with professional responders to their out of hours emergency's.

Why should Securitas be your key holder?

All Securitas Mobile security guards are fully trained and licensed in accordance with Republic of Ireland PSA regulations.

We provide the fastest emergency intervention response times for key holding and alarm response within the industry by the unique use of our TracVault system.

Our other unique selling point is that we use the 'TRACvault' system which is a small safe which houses the keys to the property which is affixed to the outside of the building.

It is made of heavy duty metal and complies with all insurance standards. The "TRACvault" can only be accessed by an authorized electronic "TRACkey". This intelligent pager sized electronic key enables Securitas to provide a full auditable service.

Page 6 of 10

As the keys are located on your premises, and as all our officers have a "TRACkey", we are able to send the closest patrol vehicle immediately to site, dramatically cutting down our response times. We go straight to your alarm all the time, every time which is why we have the fastest response time in the business.

As your key holder, we ensure your keys are secured on your site. In the event of an alarm activation our nearest mobile patrol officer can attend, therefore reducing time spent collecting keys from a central office held point.

Page 7 of 10

Used in conjunction with our Global Positioning Tracker and Geo Fence Automated reporting systems, plus GRS reporting system and TRACvault activity reports, we can provide a full four way independent auditing of our key holding service as proof of our service excellence and the delivery of that excellence for all your alarm activations.

A fast intervention is the key to damage limitation.

The sooner we arrive at your premises the less chance of unnecessary loss or disruption.

When your alarm activates, we reckon that you would want Securitas Mobile with our dedicated fleet to go direct to your alarm activation rather than like other security companies who have to go back to their office to get your keys and only then start their attendance of your alarm activation.

Our Competitors Problem

The Securitas Solution

Premises Lock Ups & Unlocks

As a business, it can be very difficult to find a dependable and trustworthy key holder to do daily locks and unlocks on your premises and trying to balance the increased security risks of having untraceable keys to your premises off site, and out of your control.

Reduce your liabilities

Having one of our Private Security Authority (PSA) Licensed Professional Mobile Security Officers to do this can cut out the cost of paying your staff to come in and open early or stay late to lock your premises up. It will also cut out the cost key replacements should your staff lose them or leave and reduce production time lost through waiting for the correct person to open up the premises.

But from a security risk viewpoint, you vastly reduce the risks to your premises as your staff don't have your keys and the integrity of your premises is maintained and enhanced through the removal of your staff having the keys off-site for your premises.

Professional Officers

Having a Professional Mobile Security Officer also means that the premises can be opened for lone workers, Staff working on rush last minute orders or deliveries at short notice. This service is especially appropriate on days when the premises are not usually open such as weekends and evenings or Bank Holidays when sending a member of staff would be both expensive and unsociable. Our fully PSA licensed professional mobile security guards are responsible for locking up at

Page 10 of 10

night after workers have gone home, and returning in the morning to do the unlocking for your day staffs and check the safety and security of the building.

Furthermore, a 24-hour call out service means that even at very short notice an officer can be at the premises ready to carry out all the necessary checks.

Our fully trained officer, will thoroughly patrol and secure your buildings, as stipulated by you in our agreed assignment Instructions.

Get some peace of mind

Our officers can turn off lights and equipment, whilst also ensuring that windows and doors are securely closed and locked, helping to also reduce your energy bills, whilst also securing your premises.

A full independent Satellite GEO Fence report of the arrival and departure of our vehicle can be available to you immediately by email, which will highlight the time of the officers arrival at your premises.
