

Remote Patrol

A Smarter Way to Patrol Your Premises

Remote patrol gives you a proactive security presence that's ready to help deter trouble 24/7. Remote patrolling via strategically placed cameras gives you eyes on your weak spots that can monitor more consistently and cost-effectively than security officers alone.

Video-based patrols form the basis of an all-encompassing security solution. Our remote officers can conduct patrols once or several times per night. By logging into the camera network, they are able to conduct a full exterior patrol, noting and responding to any unusual behavior

in your parking lots, along fence lines and in places which the naked eye alone cannot detect activity. On an interior patrol, our remote officers can check for unauthorized after-hours activity, perform fire-watches, and conduct health and safety inspections.

Advantages of Remote Patrol:

- More consistent coverage of all your critical areas
- Cost-effective even if you have many sites in remote locations
- Enhances the efficiency of on-site security officers
- Quickly and efficiently increase and improve the security footprint
- Access to cutting edge technology with no new major investment
- Can help to prevent incidents before they happen
- Part of a comprehensive security service portfolio

How Remote Patrol Works:

- Expert consultation to find best camera locations and angles
- Cameras and software connect to a 24/7 monitoring center
- Highly trained professionals conduct virtual tours of your facility
- Response can include one- or two-way audio for live intervention
- Evidence is documented if an incident occurs
- Open platforms allow existing equipment to be utilized – often in combination with cutting edge technology

Partner network brings together industry's best

Securitas USA has global agreements with some of the security industry's top innovators. This allows us to deliver the best possible technology and services in simple, cost-effective packages.

A knowledge leader in security

Remote Guarding, managed by Securitas USA, gives you state-of-the-art security in innovative and cost-effective packages. Cutting edge cameras and software create real-time security that helps prevent incidents, optimizes security officers' time and reduces costs. Securitas USA can design, install and maintain the technology equipment used for this service.

Securitas USA offers a broad range of services that include specialized guarding, technology solutions, mobile guarding and corporate risk management; we customize offerings that are suited to the individual customer's needs. From small businesses to large corporations, our more than 85,000 employees make a difference every day.
