

Guarding Solutions

*Taking a Flexible, Cost Effective
Approach to Manned Security*

Can you effectively guard your commercial premises and still deliver cost savings that will have an impact on your bottom line?

With Securitas Mobile the answer is YES!

New higher standards in licensing have brought quality and recognition to our industry - it has, however, driven up the cost to the customer through higher wages and the investment in security training.

You need 24 hour guarding, however, higher costs mean that we need to review the dependency on 'arms and legs' as a solution.

Securitas Mobile offer the complementary service that adds value to static guarding but radically reduces costs.

What are Securitas offering that is different?

A flexible solution combining Mobile and Static services. Our customers find that replacing one or more static officer with highly visible random Mobile patrols is an effective deterrent.

With such a cost saving will my security be compromised?

With our technology our customers have peace of mind. All of our Officers carry a personal digital assistant which is used in conjunction with strategically placed barcodes at your property. Our Mobile Patrols Officers scan these barcodes with their personal digital assistant during the patrol, and a report is emailed to your desktop highlighting any security hazards that have been found. The innovative audit trails ensure that you have clear visible evidence of all internal and external patrols.

Random patrols are a proven crime deterrent, giving peace of mind to your remaining guard and high visibility/vigilance to the criminal fraternity.

What next?

One of our local security consultants will evaluate your current situation and advise on how our solution can be implemented, at minimal inconvenience to your business continuity.

Services Securitas Mobile can offer in conjunction with manned guarding include:

- Keyholding and alarm response
- Mobile Patrols (day and night)
- Building locks and unlocks
- Lone worker protection

Summary

- **Flexible**
One size does not fit at all
- **Innovative**
Move away from traditional thinking
