Comments from the President and CEO

Managing a challenging time

The Group delivered organic sales growth in the first quarter of 2 percent (7). Organic sales growth declined in all business segments due to the extraordinary situation of the corona pandemic which started to affect our business in the beginning of March and increasingly throughout the month. Our business segment Security Services Europe was most impacted, mainly driven by a rapid decline in activity in the aviation business.

Security services are considered essential services in most countries. We have been able to respond quickly to our clients' demands by leveraging our strong range of protective services through our global and local footprint. We protect critical activities and supply chains required to handle the pandemic, including increased activity levels at hospitals and protection of facilities.

Security solutions and electronic security grew by 10 percent in the first quarter to represent 22 percent of total Group sales. We are currently not prioritizing acquisitions but we intend to return to our previous acquisition approach when the situation normalizes.

The operating margin in the first quarter was 3.8 percent (4.8), a decline deriving from all

business segments but the main impact from Security Services Europe. The price and wage balance was on par in the first quarter and retaining that balance is a key focus area in 2020.

The operating result, adjusted for changes in exchange rates, declined by 19 percent. Earnings per share, before items affecting comparability, amounted to SEK 1.70 (2.12).

We delivered a good cash flow in the first quarter and our strong focus on cash management remains a key priority across all business segments.

Focus during a challenging period

Our current focus is on four priorities: the health and safety of our employees, maintain delivery of our services to our clients, cash flow and cost.

Securitas leaders and employees have demonstrated tremendous strength in maintaining business continuity, swiftly mobilizing resources to meet critical client demands. We are working relentlessly to adapt our way of working to minimize the risk of spreading of the virus and to secure protective equipment. To protect our strong financial position, we have taken a number

of cash measures. We have also signed a new revolving 5-year credit facility used to replace the existing one. We are closely managing costs and continuously assessing how to adjust the business. 10 000 of our employees across the business are currently on a temporary unemployment scheme.

We continue to drive the strategic transformation programs despite the currently challenging conditions. Driving digitization and modernization is critical to enhance our offering and value creation in the future.

Looking ahead, we face significant uncertainty related to the corona pandemic. We are assessing different scenarios to ensure preparedness. We will continue to implement proactive measures to mitigate the impacts, and will take action as deemed necessary.

We are working closely with our clients to support them in re-starting their operations. This is critical work not only for our clients but for many economies, people and society at large.

January-March 2020

Organic sales growth was 2 percent (6), on a strong comparative with a solid client retention rate of 92 percent (89). Organic sales growth was stable throughout the quarter. Main contribution to organic sales growth derived from Guarding, while the business unit Critical Infrastructure Services was slightly negative. Increased extra sales in Guarding offset limited service reductions in the portfolio. Electronic Security hampered organic sales growth due to negative impact from the corona pandemic on the installation business.

Security solutions and electronic security sales represented MSEK 2 304 (2 078) or 18 percent (18) of total sales in the business segment in the first quarter.

The operating margin was 5.2 percent (5.7), a decline primarily related to the business unit Critical Infrastructure Services. The situation in Critical Infrastructure Services improved in the first quarter, but slower than expected. The operating margin on the installation business in Electronic Security was negatively impacted by the corona pandemic. The business unit Guarding supported the operating margin in the business segment.

The Swedish krona exchange rate weakened against the US dollar, which had a positive effect on operating income in Swedish kronor. The real change was -6 percent (13) in the first quarter.

Security Services Europe

Security Services Europe provides protective services across Europe with operations in 27 countries, whereof 15 countries provide airport security. The full range of protective services includes on-site, mobile and remote guarding, electronic security, fire and safety services and corporate risk management. In addition there is a specialized unit for global client contracts.

January-March 2020

Organic sales growth was 0 percent (4) and the client retention rate was 89 percent (93). Organic sales growth year-to-date February was 2 percent but -3 percent in the month of March. The decline was partly explained by the contract losses in France and in the UK, as well as the Aviation contract in Norway, as previously communicated. The corona pandemic impacted negatively on sales in the month of March, primarily airport security, event security and installations within electronic security. Increased demand for temporary guarding services due to the corona pandemic did not offset the overall decline in sales.

Security solutions and electronic security sales represented MSEK 2 679 (2 516) or 23 percent (22) of total sales in the business segment.

The operating margin was 3.6 percent (5.0). The decline related primarily to the corona pandemic in the month of March with reductions in client contracts, higher idle time and sickness costs.

The Swedish krona exchange rate weakened against foreign currencies, primarily the Euro, which had a slight positive effect on operating income in Swedish kronor. The real change was -27 percent (8) in the first quarter.

Security Services Ibero-America

Security Services Ibero-America provides protective services in nine Latin American countries as well as in Portugal and Spain in Europe. Airport security is offered in seven countries. The offered services include on-site, mobile and remote guarding, electronic security, fire and safety services and corporate risk management.

January-March 2020

Organic sales growth was 9 percent (19), on a strong comparative that included double digit sales growth in Spain. Organic sales growth year-to-date February was 10 percent but 7 percent in the month of March. Spain was, as previously communicated, impacted by reductions of short term security solutions contracts and also now by the corona pandemic. Despite these negative impacts, organic sales growth in Spain remained positive in the quarter. Organic sales growth was positively impacted by price increases in Argentina, whereas Peru had negative organic sales growth. The client retention rate was 92 percent (92).

Security solutions and electronic security sales represented MSEK 1 000 (885) or 29 percent (27) of total sales in

the business segment, supported by the Techco Security acquisition in Spain in 2020.

The operating margin was 4.4 percent (4.7), burdened by Peru and the impact from the corona pandemic with higher idle time and sickness costs, primarily in Spain and Portugal. Furthermore, the general environment in Argentina remains challenging.

The Swedish krona exchange rate strengthened against the Argentinian peso, while it weakened against the Euro. The net effect was slightly negative on operating income in Swedish kronor. The real change in the segment was 0 percent (21) in the first quarter 2020.

Cash flow from operating activities include net investments in non-current tangible and intangible assets, amounting to MSEK -57 (-67). If no significant events have occurred relating to the information in the Annual Report, no further comments are made in the Interim Report for the respective case.

Securitas AB withdraws the dividend proposal, revises proposals to the AGM and voting procedures due to the COVID-19 situation

The Board of Directors of Securitas AB decided on April 28 to withdraw its dividend proposal for the AGM 2020 due to the uncertainty caused by the COVID-19 situation and may consider later to resolve on a new dividend proposal. Furthermore, the Securitas AB Nomination Committee has decided to withdraw its proposal for increased board fees and has instead proposed that the AGM resolves that the current board fees remain unchanged this year. The Board also decided that shareholders who choose to not physically attend the meeting may exercise their voting rights at the meeting by voting in advance by postal votes.

Risks and uncertainties

Risk management is necessary for Securitas to be able to fulfill its strategies and achieve its corporate objectives. Securitas' risks fall into three main categories; contract and acquisition risks, operational assignment risks and financial risks. Securitas' approach to enterprise risk management is described in more detail in the Annual Report for 2019.

In the preparation of financial reports, the Board of Directors and Group Management are required to make estimates and judgments. These estimates and judgments impact the statement of income and balance sheet as well as disclosures such as contingent liabilities. The actual outcome may differ from these estimates and judgments under different circumstances and conditions.

Securitas as well as other companies are currently facing the challenge of the corona pandemic. As disclosed in this interim report, the corona pandemic has negatively impacted the Group's financial statements, and poses an additional challenge when making estimates and judgments.

For the forthcoming nine-month period, the financial impact of the corona pandemic as well as certain items affecting comparability, provisions and contingent liabilities, as described in the Annual Report for 2019 and, where applicable, under the heading "Other significant events" above, may vary from the current financial estimates and provisions made by management. This could affect the Group's profitability and financial position.

Guarding services

This comprises on-site and mobile guarding, which is services with the same revenue recognition pattern. Revenue is recognized over time, as the services are rendered by Securitas and simultaneously consumed by the customers. Such services cannot be re-performed.

Security solutions and electronic security

This comprises two broad categories regarding security solutions and electronic security.

Security solutions are a combination of services such as on-site and/or mobile guarding and/or remote guarding. These services are combined with a technology component in terms of equipment owned and managed by Securitas and used in the provision of services. The equipment is installed at the customer site. The revenue recognition pattern is over time, as the services are rendered by Securitas and simultaneously consumed by the customers. A security solution normally constitutes one performance obligation.

Electronic security consists of the sale of alarm installations comprising design and installation (time, material and related expenses). Revenue is recognized as per the contract, either upon completion of the conditions in the contract, or over time based on the percentage of completion. Remote guarding (in the form of

alarm monitoring services), that is sold separately and not as part of a security solution, is also included in this category. Revenue recognition is over time as this is also a service that is rendered by Securitas and simultaneously consumed by the customers. The category further includes maintenance services, that are either performed upon request (time and material) with revenue recognition at a point in time (when the work has been performed), or over time if part of a service level contract with a subscription fee. Finally there is also a to a limited extent product sales (alarms and components) without any design or installation. The revenue recognition is at a point in time (upon delivery).

Other

Other comprises mainly corporate risk management services that are either recognized over time or at a point in time as well as other ancillary business.

Other operating income

Other operating income consists in its entirety of trade mark fees for the use of the Securitas brand name.
