# Comments from the CEO, Thomas Berglund

"The Group has strong organic sales growth and stable underlying development of profitability. This has been achieved at the same time as we are creating three new listed companies, which demonstrates the strength of Securitas' organization. The Group is on track for a full year strong organic sales growth and income before taxes is expected to increase in line with last year's increase, excluding non-recurring costs".

The trend from 2005 with positive development in both organic sales growth and operating margin continues. With the key indicators such as new sales and increase in contract portfolio ahead of last year, the division is set to continue the positive trend going forward.

In the beginning of August, 2006 the North American operation retained and expanded the contract with General Motors in the USA and Europe. The contract has a total value of approximately MUSD 800 over five years, and includes physical guarding, and technology/systems support services in approximately 150 locations in 21 countries throughout North America, Europe and Argentina. This clearly demonstrates the benefit of specialization and the ability to use the combined strength of Securitas' organisation in both USA and Europe. The contract is effective as of January 1, 2007.

## April - June 2006

The organic sales growth was 7 percent in the second quarter. The improved organic sales growth rate compared to 2005 is a consequence of the growing portfolio, especially within National accounts. Out of the 13 regions in USA 11 (including the 10 guarding regions) achieved higher organic sales growth rates than in the first quarter.

The improvement in operating margin is attributable to leverage on the increased sales volume.

## January – June 2006

The organic sales growth was 6 percent in the first half 2006. Sales volumes bottomed out in the first quarter 2005 and organic sales growth in the first half 2006 was therefore slightly higher than what is expected to be the full year development.

The operating margin was 4.8 percent. For the full year 2006 the operating margin is expected to be slightly higher than for the full year 2005.

Sales of new contracts were strong with a volume increase of 15 percent compared to the first half 2005. The contract portfolio grew by 4-5 percent on an annualized basis. Prices and wages increased by 2 percent and the client retention rate remained stable over 90 percent. The employee turnover was 70 percent, which is an increase compared to the first quarter mainly due to an overall stronger U.S. labour market.

In Security Services Europe the new organization was implemented during 2005. The business is now divided into four specialized vertical units - Permanent guarding and Transport aviation security for large customers and Mobile services and Alarm monitoring for small customers. The split into these four vertical units will continue to increase focus and refinement going forward.

In July 2006 the Permanent guarding unit and the Transport aviation security operation in Sweden jointly received a contract with the Swedish Aviation Authority (Luftfartsverket) to provide security solutions and technology support to both Arlanda and Bromma airports in Stockholm. Saab Systems in Sweden was chosen as technology partner to provide the technical platform. The total value of the contract is approximately MSEK 1,000 over five years effective as of February 1, 2007. This contract demonstrates the strength of the new organization in Europe.

#### April - June 2006

The organic sales growth was 7 percent in the second quarter, driven by the growth in the contract portfolio. The organic sales growth is slightly positively impacted by the Football World Championships in Germany.

The decrease in operating margin is mainly explained by the impact of the losses of contracts and price reductions in the airport security business that occurred in 2005 and start up costs for new contracts. The negative impact in the second quarter was MSEK 35. The rest of the businesses are continuing to show good performance with strong organic sales growth in permanent guarding in Norway, Denmark, UK, Spain, Switzerland and Argentina. Mobile services for small clients show good organic sales growth especially in the Nordic Region, France, Spain and Belgium.

## January - June 2006

The organic sales growth was 6 percent during the first half 2006. For the full year 2006 the organic sales growth is expected to be in line with the 5 percent reported in 2005.

The operating margin was 6.6 percent which is 0.7 percentage points lower than for the first half 2005. The operating income was negatively impacted by the airport security business with MSEK 65. The airport security business continue to show strong organic sales growth and the operating income has now stabilized and is expected to stay flat compared to 2005, during the rest of the year.

Further, the German business has not been able to compensate some large contract losses that occurred in the second half 2005. This impacted the operating income with MSEK -15 in the first quarter 2006. Germany has not been able to recover these losses during the second quarter and the operating income in 2006 is expected to stay flat compared to 2005. The total impact of the the airport security business and the German contract losses was MSEK -80, which is also the estimated impact for the full year 2006.

For the full year 2006 the operating margin is expected to be slightly lower than in 2005.

The contract portfolio grew by 4 – 5 percent on an annualized basis. Prices and wages increased 1.5 percent on an annual basis. The client retention rate was around 90 percent on an annual basis. The employee turnover was 36 percent.

Return on capital employed, % 2)	-	_	19	19	19	

<sup>1)</sup> Adjusted for IAS 19 amendment.

In Securitas Systems the focus is on driving organic development and to establish new and expand existing platforms. The organic development involves a first step of splitting the production organization between installation and maintenance. In a second step, the organization is split between customer segments, with banks and chain customers as important segments. Parallel to this, efficient sourcing of components has been in focus.

With the recent acquisitions of Wornall Electronics, Hamilton and Premier Security in the USA, Securitas Systems is now also a main player in the USA. In Europe, Securitas Systems continues to build a platform with specific focus on banks.

## April – June 2006

The organic sales growth was 4 percent in the second quarter 2006. The lower than expected organic sales growth is mainly explained by a temporary lower than expected installation pace. The order intake is continuing to be strong in the division. Actions have been taken to ensure an increased installation pace going forward.

The operating margin was 9.8 percent in the second quarter which is 1.5 percentage points lower than in 2005. The operating margin was negatively impacted by costs for the listing project and the consolidation of Hamilton in the USA with a lower operating margin than the divisional average.

The positive development in the underlying U.S. business continues with double digit organic sales growth rates and an increase in the operating income above divisional average.

## January – June 2006

The organic sales growth was 7 percent, which is 1 percentage point higher than for the first half 2005. Large countries reporting organic sales growth higher than the divisional average were Spain, USA and Germany. In Sweden, Norway, France and the UK the organic sales growth was slightly lower than the divisional average.

The operating margin was 9.6 percent, which is 0.7 percentage points lower than in 2005. This is explained by costs for the listing project and the consolidation of Hamilton in the USA with a lower operating margin than the divisional average.

For the full year 2006, organic sales growth is expected to improve compared to 2005 and operating margin to be in line with 2005.

The Direct business has its entire focus on organic development. During the last three years resources have been allocated to speed up the development in countries where Direct is already operating and prepare to expand into new markets with organic start-ups. The new consumer concepts are being developed in all countries of operation with a current focus on France, Belgium and the Netherlands.

1) Adjusted for the transfer of 4,174 connected alarms to Security Services Europe (Alert Services).

### April - June 2006

The organic sales growth was 24 percent, in spite of the negative impact coming from the transition into franchise partner sales in the Nordics, where the installation revenue is recognized by the partner instead of Securitas Direct.

The lower operating margin compared to the second quarter 2005 is explained by the investments made in the French and Benelux markets, and costs for the listing project. In France and Benelux organic sales growth improved but the operating margin was still insignificant.

## January - June 2006

The organic sales growth was 24 percent. For the full year 2006 the organic sales growth is expected to stay around, or be slightly higher than 25 percent.

The operating margin was 7.6 percent which is 1.2 percentage points lower than 2005. The lower operating margin was explained by the investments made in the French and Benelux markets and costs for the listing project. For the full year 2006 the operating margin is expected to be around 9 percent.

The portfolio growth of 24 percent was well above the divisional target of 20 percent. The customer cancellation ratio was well under the divisional target of 6 percent and the pay back time for new customers was in line with the divisional target, which is less than four years.

Cash Handling Services provides transportation of cash, maintenance of cash machines and cash management. The aim is to increase the proportion of maintenance and cash management and this proportion is now up to 34 percent of total sales in the division.

A provision has been made of MEUR -40.4 (MSEK -373) in relating to the Welo claim arising from the divested German Cash Handling Services operation. The Welo claim has previously been filed as an insurance claim, which will continue to be pursued as planned. Please refer to Other significant events, page 13 in this report for further information.

## April - June 2006

The organic sales growth was 6 percent, which is 3 percentage points higher than in the second quarter 2005. The U.S. cash handling operations grew with 7 percent in the second quarter which is an improvement of 6 percentage points.

The operating margin was -6.0 percent which is 12.7 percentage points lower than last year, including the Welo provision of MSEK -373 and the operating loss of MSEK -18 in the German operation, divested in the fourth quarter 2005. Excluding the Welo provision the operating margin was 7.1 percent.

The operating income in the second quarter was also somewhat burdened due to difficulties to cover increased fuel costs and wage increases in the USA, start up costs for new contracts, and costs for the listing project.

## January - June 2006

The organic sales growth was 6 percent supported by the strong growth in the U.S. operations.

The operating margin was 0.2 percent, which is 6.1 percentage points lower than last year, including the Welo provision of MSEK -373 and the operating loss of MSEK -36 in the German operation, divested in the fourth quarter 2005. Excluding the Welo provision the operating margin was 6.7 percent.

The operating income in the first half 2006 was also somewhat burdened due to difficulties to cover increased fuel costs and wage increases in the USA, start up costs for new contracts, and costs for the listing project.

The operating results in Sweden and the UK are improving and the operating margins are approaching the divisional average. Both these countries have been burdened by costs caused by operational interruptions relating to the recent robberies. The cash center in Tonbridge, UK suffered a large loss in February 2006. The original loss of MGBP 53 has been reduced to MGBP 33. The loss is covered under valid insurance programs.

Strong development was recognized in France with higher organic sales growth and margins above divisional average.

For the full year 2006 the organic sales growth is expected to be higher than for the full year 2005, including the divested German cash handling operation, and the operating margin is expected to show significant improvements, approaching 9 percent, excluding the Welo provision of MSEK -373. The improvements will be supported by higher operational efficiency in Valiance in France, efficiency improvements in Sweden and the UK transport business and expected price increases to compensate for increased fuel costs and wage increases in the USA.

<sup>2)</sup> The calculation is based on end rates for the balance sheet and average rates for the statement of income.

#### April - June 2006

Operating income before amortization amounted to MSEK 646 (1,032) including the Welo provision which has not impacted the cash flow. Net investments in fixed assets after depreciation amounted to MSEK -154 (-148).

Changes in accounts receivable amounted to MSEK -247 (-154) and changes in other operating capital employed amounted to MSEK 516 (-39).

Cash flow from operating activities amounted to MSEK 761 (691), equivalent to 118 percent (67) of operating income before amortization.

Free cash flow was MSEK 333 (274), equivalent to 114 percent (40) of adjusted income.

#### January - June 2006

Operating income before amortization amounted to MSEK 1,646 (1,970) including the Welo provision which has not impacted the cash flow. Net investments in fixed assets after depreciation amounted to MSEK -190 (-145).

Changes in accounts receivable amounted to MSEK -242 (-155) and changes in other operating capital employed amounted to MSEK -317 (-529). The change in operating capital employed was negatively affected by payroll related timing differences in the USA of approximately MSEK 100 and an insurance related self-retention payment of MSEK 120 relating to the robbery against Cash Handling Services in the UK in February 2006. These effects will be neutralized during the course of the year. The increased organic sales growth for the Group was also reflected in the negative change of operating capital employed.

Cash flow from operating activities amounted to MSEK 897 (1,141), equivalent to 54 percent (58) of operating income before amortization.

Subject to a decision by an Extraordinary General Meeting to be held on September 25, 2006 the companies are to be listed on the O-list of the Stockholm Stock Exchange immediately thereafter.

## Loomis Cash Handling Services

As announced in the Securitas Interim Report for January – March 2006, in addition to the listing process of Loomis Cash Handling Services AB, Securitas has evaluated indications of interest from financial and industrial buyers of the Cash Handling Services division. Securitas AB has after due consideration of the received indications of interest concluded that the stock exchange listing alternative should continue to be pursued, and consequently the division will not be divested. It will, however, not be possible to list the division in September 2006, when Securitas Systems and Securitas Direct will be listed as planned. Loomis Cash Handling Services AB will be listed during 2007 according to a new timetable to be announced later.

#### Financing

Securitas AB and the banks participating in the two central syndicated loan facilities have agreed to amend certain parts of the loan documentation in order for the suggested dividend transactions not to be deemed as an event of default under the documentations, so that the facilities can be maintained unchanged.

On June 27, 2006 an extraordinary resolution was passed by the holders of the Securitas AB 6.125 percent MEUR 500 Notes due 2008, which clarified that the suggested dividend transactions were not to be deemed as an event of default under the terms and conditions of the Notes. ## OTHER SIGNIFICANT EVENTS

## Update on contingent liabilities

A detailed account of the developments relating to contingent liabilities has been presented in the published Annual Report for 2005 Note 36, Contingent Liabilities page 100.

## WELO claim (Cash Handling Services)

During 2001 Securitas in Germany in response to customer requests took on cash booking responsibilities (referred to as Welo - WErte LOgistik) in addition to the cash in transit activities which it had historically provided in Germany. In connection with the performance of these Welo activities during the time of the euro introduction in Germany, a total loss of MEUR 40.4 (MSEK 373) developed with a major customer. The amount of the loss was advanced by Securitas Germany to the customer in accordance with the relevant contract in two payments (one paid in 2003 and the other paid during 2004) and the equivalent has been claimed against the relevant insurance policies.

The German Cash Handling operations were divested in November 2005 to the German Heros Group, however the economic interest in the Welo claim was retained by Securitas as part of that transaction. The company holding the legal Welo claim was sold to Heros in this transaction. In February 2006 the Heros Group of companies filed for insolvency under German law including the company which is the nominal plaintiff in the Welo claim. Against this background Securitas has decided to provide for the full Welo claim, MEUR -40.4 (MSEK -373) in the period. The insurance claim will continue to be pursued as planned.

There have been no material developments in the other matters described subsequent to the published Annual Report for 2005.

## Securitas AB 6.125 percent MEUR 350 Euro Notes 2006

The notes matured in January 2006 and have been refinanced by drawings under other Group financing facilities.

#### ACCOUNTING PRINCIPLES

#### In general

Securitas' consolidated financial statements are prepared in accordance with International Financial Reporting Standards (IAS/IFRS as endorsed by the European Union) issued by the International Accounting Standards Board and interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC).

This interim report has been prepared in accordance with IAS 34 Interim Financial Reporting and RR 31, Consolidated Interim Financial Reporting. The most important accounting principles under IFRS which is the basis for the preparation of this interim report can be found in Note 1 on pages 80 to 83 in the published Annual Report for 2005. The accounting principles are also available on the Group's website www.securitasgroup.com under the section Financial Information – Accounting Principles.

#### Adoption and impacts of new and revised IFRS for 2006

The Group has adopted the amendment to IAS 19 Employee Benefits as of January 1, 2006.

This amendment has from January 1, 2006 changed the Group's principle for recognizing gains and losses resulting from changes in actuarial assumptions, plan experience and developments of the investment performance differing from that assumed. According to the principles that were in force for 2004 and 2005, these had been spread evenly in the statement of income over the future working lives for the employees covered by the plan to the extent that accumulated gains and losses on the balance sheet date fell outside the so called corridor at the beginning of the period. The changed accounting principle means that these gains and losses now are recognized immediately via equity. Comparatives for 2004 and 2005 have been restated accordingly.

Further information is provided in Note 3 on page 19.

#### REVIEW REPORT

We have reviewed the interim report for Securitas AB (publ.) for the period ended June 30, 2006. Management is responsible for the preparation and presentation of this interim financial information in accordance with IAS 34 and the Annual Accounts Act. Our responsibility is to express a conclusion on this interim financial information based on our review.

We conducted our review in accordance with the Standard on Review Engagements SÖG 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity issued by FAR. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing in Sweden RS and other generally accepted auditing practices. The procedures performed in a review do not enable us to obtain a level of assurance that would make us aware of all significant matters that might be identified in an audit. Therefore, the conclusion expressed based on a review does not give the same level of assurance as a conclusion expressed based on an audit.

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information is not, in all material respects, in accordance with IAS 34 and the Annual Accounts Act.
