

Remote Entry/Exit Management

Improve Your Access Control and Help Keep Your Facility Safe

Securitas USA Remote Entry/Exit Management provides on-demand processing of authorized employees and visitors requiring access to your facility. Our remote monitoring center activates cameras and audio devices, scans the area and follows the established authorization protocol.

Through a combination of technologies our remote officers can respond to an employee or visitor seeking entry into your facility and make access control or security response decisions based on your specific protocols.

- **Gate Entry Management** - After-hour shipments through truck gates are screened and processed. Our remote officers can check the driver's credentials, confirm the vehicle license plate matches the documentation and allow or deny access to the facility.

- **Vendor Entry Management** - Prior to allowing entry into your facility, we can confirm the identity and check the credentials of cleaning and maintenance crews. This also creates a video record and time log of who entered.
- **Remote Lobby** - Rather than "buzzing in" guests sight unseen, or staffing an entrance which receives a few visitors daily, our operators can perform an entry screening remotely. Once the visitor has been confirmed, the remote agent can inform relevant on-site personnel of the visitor's arrival, and allow access into the facility.

Advantages of Remote Entry/Exit Management:

- On-demand processing of employees, visitors and contractors
- Services provided as needed
- Cost-effective even if you have many sites in remote locations
- Access to cutting edge technology with no new major investment
- Part of a comprehensive security service portfolio

How Remote Entry/Exit Management Works:

- Expert consultation to find best camera locations and angles
- Cameras and software connect to a 24/7 remote monitoring center
- Highly trained professionals remotely respond and process requests for entry to your facility
- Response can include one- and two-way audio for live intervention
- Keep close watch during critical events, e.g. opening/closing, transferring goods, etc.
- Evidence is documented if an incident occurs
- Open platforms allow existing equipment to be utilized

Partner network brings together industry's best

Securitas USA has global agreements with some of the security industry's top innovators. This allows us to deliver the best possible technology and services in simple, cost-effective packages.

A knowledge leader in security

Remote Guarding, managed by Securitas USA, gives you state-of-the-art security in innovative and cost-effective packages. Cutting edge cameras and software create real-time security that helps prevent incidents, optimizes security officers' time and reduces costs. Securitas USA can design, install and maintain the technology equipment used for this service.

Securitas USA offers a broad range of services that include specialized guarding, technology solutions, mobile guarding and corporate risk management; we customize offerings that are suited to the individual customer's needs. From small businesses to large corporations, our more than 85,000 employees make a difference
