

Maintenance Packages

Selecting, designing and installing the right system for your needs was only the first part of the security journey. Now, you need to make sure that it continues to work the way you envisioned it. With a Securitas USA maintenance agreement, we help keep your system functioning optimally ... the way you want it!

PREVENTATIVE COVERAGE

Preventative Coverage includes 1, 2 or 4 scheduled maintenance visits each year (different schedules are appropriate depending on the complexity of the system). These visits consist of an inspection, and preventative maintenance on all systems which are part of the agreement with Securitas USA. Our technician will provide you with a comprehensive report along with service recommendations in order to maintain the system operating optimally. Inspections will be scheduled to occur within our normal working hours 8.30am - 5.00pm, Monday to Friday.

PREVENTATIVE PLUS

Preventative Plus includes all of the same coverage as the Preventative plan, plus you can get a service call response as fast as the same day on covered systems, depending on the issue. A Securitas USA technician will diagnose the issue and then take the appropriate actions to get the system fully functioning. The only thing you have to pay for is any part which must be replaced (that is not under warranty).

GOLD PLAN

Gold Plan includes all of the same great coverage as the Preventative Plus plan with the added convenience that the cost of any required replacement equipment (up to \$500) is also covered.

Need more coverage?

Securitas USA can provide you with a fully customized maintenance plan, tailored to your particular needs. Please contact us at 877-281-5543 or visit www.securitasinc.com.
